- TDD

## WORK EXPERIENCE

### Technical Product Manager, FlashSpread — 2022-Present

- Focused on enhancing existing functionality and designing new features to make FlashSpread the best docs-to-data system for Commercial Lending.
- Coordinated with the development lead to ensure the team of 5 developers understood and met business requirements every agile sprint cycle.
- Hand-picked by the BeSmartee CEO to step in as Product Manager and assist the Flashspread General Manager when the company was acquired.

### Technical Product Manager, BeSmartee — 2021-Present

- Led a dedicated team of developers and testers in building a new Fee Management product, that I designed from-scratch, to segment functionality from our monolith application into a dedicated application.
- Worked with the engineering team, via the Fees product, to set a standard of micro-service architecture, test driven development, and CI/CD for new applications.

### Lead Developer (Implementation), BeSmartee — 2019-2021

- Managed a team of 3 other developers and saw to their professional and technical growth.
- Introduced processes and procedures to improve implementation efficiency from initial client request to final feature delivery.
- Individually managed our second largest client, at the time, and led them through a 10+ legacy version upgrade with no issues.
- Led the design and development of a new product which quickly and dynamically implemented functionality for new clients via custom workflows. This also introduced the Laravel framework and modern PHP design to the engineering department.

### Web Developer, BeSmartee — 2017-2019

- Led the charge to introduce a better source-control management system as well as solid development practices, via Git Agile and Scrum, across the entire engineering department.
- Focused on building new features and fixing bugs that were reported by clients.

### Web Developer, Freelance — 2014-2017

- Grew and applied my development skills via static sites and small web applications for a few clients while attending university.
